EXAM AWS CERTIFIED DEVELOPER - ASSOCIATE DVA-C02 TOPIC 1 QUESTIO...

Exam question from Amazon's AWS Certified Developer - Associate DVA-C02
Question #: 296
Topic #: 1
[All AWS Certified Developer - Associate DVA-C02 Questions]

A developer created an AWS Lambda function that performs a series of operations that involve multiple AWS services. The function's duration time is higher than normal. To determine the cause of the issue, the developer must investigate traffic between the services without changing the function code.

Which solution will meet these requirements?

A. Enable AWS X-Ray active tracing in the Lambda function. Review the logs in X-Ray.

B. Configure AWS CloudTrail. View the trail logs that are associated with the Lambda function.

C. Review the AWS Config logs in Amazon CloudWatch.

D. Review the Amazon CloudWatch logs that are associated with the Lambda function.

Selected Answer: A

A. Enable AWS X-Ray active tracing in the Lambda function. Review the logs in X-Ray.
X-Ray provides insights into the duration and performance of each component, helping you identify the root cause of performance issues without modifying the function code.
