Selected Answer: A

Amazon Sagemaker Feature service

upvoted 1 times

Jessiii 1 year, 1 month ago

Selected Answer: A

Amazon SageMaker Feature Store is designed to store, manage, and share features (variables) for machine learning models across teams. It provides a centralized repository to track and manage features, ensuring consistency in feature usage across various models and teams. This is ideal when you need to collaborate on feature development and reuse them in multiple ML models.

Selected Answer: A

Amazon SageMaker Feature Store helps to create, store, share, manage features that are used in ML models.

upvoted 1 times

Moon 1 year, 3 months ago

Selected Answer: A

A: Amazon SageMaker Feature Store

Explanation:
Amazon SageMaker Feature Store is a purpose-built repository for storing, sharing, and managing features (variables) used in machine learning models. It allows teams to collaborate effectively by providing a centralized location for storing and accessing features across multiple ML workflows, ensuring consistency and reusability.
