EXAM AWS CERTIFIED AI PRACTITIONER AIF-C01 TOPIC 1 QUESTION 39 DIS...

Exam question from Amazon's AWS Certified AI Practitioner AIF-C01

Question #: 39

Topic #: 1

[All AWS Certified AI Practitioner AIF-C01 Questions]

A medical company is customizing a foundation model (FM) for diagnostic purposes. The company needs the model to be transparent and explainable to meet regulatory requirements.

Which solution will meet these requirements?

A. Configure the security and compliance by using Amazon Inspector.

B. Generate simple metrics, reports, and examples by using Amazon SageMaker Clarify.

C. Encrypt and secure training data by using Amazon Macie.

D. Gather more data. Use Amazon Rekognition to add custom labels to the data.

Selected Answer: B

Amazon SageMaker Clarify is specifically designed to help make machine learning models more transparent and explainable by generating

metrics and reports on model bias, data bias, and feature importance.

Selected Answer: B

A melhor opção para garantir transparência e explicabilidade do modelo seria B. Gere métricas, relatórios e exemplos simples usando o Amazon SageMaker Clarify. Esse serviço da AWS foi desenvolvido para fornecer insights sobre o comportamento dos modelos de aprendizado de máquina, identificando vieses, medindo a importância das características e garantindo maior interpretabilidade. Isso atende diretamente aos requisitos regulatórios que exigem que os modelos sejam compreensíveis e justificados.

Selected Answer: B

Generate simple metrics, reports, and examples by using Amazon SageMaker Clarify: Amazon SageMaker Clarify helps provide transparency and explainability to machine learning models by generating metrics, reports, and visual explanations of the model's predictions. This is crucial for meeting regulatory requirements in domains like healthcare, where understanding how a model arrives at its decisions is essential for validation and trust. SageMaker Clarify also helps identify potential biases in the model, which is important for ensuring fair and responsible use of AI.

Selected Answer: B

B. Generate simple metrics, reports, and examples by using Amazon SageMaker Clarify.

Amazon SageMaker Clarify helps in identifying bias and explaining predictions made by machine learning models, which aligns well with the need for transparency and explainability to meet regulatory requirements.
