EXAM AWS CERTIFIED AI PRACTITIONER AIF-C01 TOPIC 1 QUESTION 48 DIS...

Exam question from Amazon's AWS Certified AI Practitioner AIF-C01
Question #: 48
Topic #: 1
[All AWS Certified AI Practitioner AIF-C01 Questions]

A company wants to use a pre-trained generative AI model to generate content for its marketing campaigns. The company needs to ensure that the generated content aligns with the company's brand voice and messaging requirements.
Which solution meets these requirements?

A. Optimize the model's architecture and hyperparameters to improve the model's overall performance.

B. Increase the model's complexity by adding more layers to the model's architecture.

C. Create effective prompts that provide clear instructions and context to guide the model's generation.

D. Select a large, diverse dataset to pre-train a new generative model.

Selected Answer: D

Prompt only affects the current session. It cannot ensure its generated content align with company's brand voice. To meet the requirements, you have to either use guardrail to guide the output or retrain the model with company's brand data. So the correct answer is D.

Selected Answer: C

A alternativa correta é:

C. Crie prompts eficazes que forneçam instruções claras e contexto para orientar a geração do modelo.

Explicação simples:
Se a empresa quer usar um modelo de IA já pronto (pré-treinado) para criar conteúdo de marketing alinhado com a voz da marca, a melhor maneira de garantir isso é com prompts bem feitos.

Um prompt eficaz:

Dá instruções claras sobre o tom, estilo e mensagem que o conteúdo deve seguir.

Pode incluir exemplos de conteúdo anterior, palavras-chave da marca ou diretrizes de comunicação.

Selected Answer: C

C. Create effective prompts that provide clear instructions and context to guide the model's generation: This is the best approach for aligning the generated content with the company's specific voice and messaging requirements. By crafting detailed and specific prompts, the company can guide the generative AI model to produce content that aligns with the brand's tone, values, and style. Prompt engineering allows you to control the output without needing to modify the underlying model itself.

Selected Answer: C

C. Create effective prompts that provide clear instructions and context to guide the model's generation.

Prompt engineering is a crucial technique to ensure that a pre-trained generative AI model generates content that aligns with the company's brand voice and messaging requirements. By carefully crafting prompts,

you can guide the model to produce specific, relevant, and on-brand content.
