D. aws ec2 run-instances

So, to create a new EC2 instance using the AWS CLI, you would typically use the aws ec2 run-instances command, providing the necessary parameters such as the AMI ID, instance type, security groups, and key pair, among others.

Selected Answer: D

D. aws ec2 run-instances

Note: B aws ec2 start-instances is used to "start an instance that you've previously stopped"

Selected Answer: D

```
aws ec2 run-instances \
--image-id ami-xxxxxxxx \
--count 1 \
--instance-type t2.micro \
--key-name MyKeyPair \
--security-group-ids sg-xxxxxxxx \
--subnet-id subnet-xxxxxxxx
```
