EXAM AWS CERTIFIED AI PRACTITIONER AIF-C01 TOPIC 1 QUESTION 110 DI...

Exam question from Amazon's AWS Certified AI Practitioner AIF-C01

Question #: 110

Topic #: 1

[All AWS Certified AI Practitioner AIF-C01 Questions]

A company is implementing intelligent agents to provide conversational search experiences for its customers. The company needs a database service that will support storage and queries of embeddings from a generative AI model as vectors in the database.

Which AWS service will meet these requirements?

A. Amazon Athena

B. Amazon Aurora PostgreSQL

C. Amazon Redshift

D. Amazon EMR

Selected Answer: B

Amazon Aurora PostgreSQL is the best choice for a database service to store and query embeddings from generative AI models, as it supports vector storage and similarity searches through the pgvector extension.

Selected Answer: B

Amazon Aurora PostgreSQL

Amazon Aurora PostgreSQL supports vector storage and queries, making it suitable for storing embeddings from a generative AI model as vectors in the database. It integrates with extensions like pgvector to efficiently handle high-dimensional vector data.
