Selected Answer: A

Data residency (residencia de datos) es una estrategia de gobernanza de datos que:

✔ Asegura que los datos permanezcan en una ubicación geográfica específica, según las regulaciones del país.
✔ Cumple con normativas de privacidad y seguridad como GDPR en Europa o HIPAA en EE.UU.
✔ Restringe el almacenamiento y procesamiento de datos fuera del país, evitando transferencias no permitidas.

En este caso, un hospital que maneja datos sensibles de pacientes debe asegurarse de que la información médica no se almacene ni procese fuera del país, lo que hace que Data residency sea la mejor estrategia.
