EXAM AWS CERTIFIED AI PRACTITIONER AIF-C01 TOPIC 1 QUESTION 146 DI...

Exam question from Amazon's AWS Certified AI Practitioner AIF-C01

Question #: 146

Topic #: 1

[All AWS Certified AI Practitioner AIF-C01 Questions]

What does an F1 score measure in the context of foundation model (FM) performance?

A. Model precision and recall

B. Model speed in generating responses

C. Financial cost of operating the model

D. Energy efficiency of the model's computations

Selected Answer: A

The correct answer is A: Model precision and recall.

The F1 score is a statistical measure that evaluates the balance between precision and recall in a model's predictions. It's particularly valuable for foundation models when evaluating tasks where both false positives and

false negatives have significant implications, such as content moderation, information extraction, or classification tasks.

Selected Answer: U

A resposta correta é A. Precisão e recall do modelo.

A pontuação F1 é uma métrica estatística usada para avaliar o desempenho de modelos de aprendizado de máquina, especialmente em situações de classificação. Ela representa a harmonia entre precisão (quantos dos exemplos classificados como positivos são realmente positivos) e recall (quantos dos exemplos positivos foram corretamente identificados pelo modelo). É particularmente útil quando há um equilíbrio necessário entre os dois e, muitas vezes, é aplicada em cenários com dados desbalanceados.
