Selected Answer: B

Rekognition specializes in image and video analysis, including features like content moderation, object detection, and facial recognition. Comprehend, on the other hand, is a natural language processing (NLP) service that focuses on analyzing text, enabling tasks like sentiment analysis, entity recognition, and topic modeling.

Selected Answer: B

A estratégia correta é B. Use a detecção de toxicidade do Amazon Comprehend.

O Amazon Comprehend é um serviço que utiliza processamento de linguagem natural (NLP) para analisar texto e identificar linguagem prejudicial, como comentários tóxicos. Ele permite detectar automaticamente padrões de toxicidade sem depender de dados rotulados para treinamento, tornando-se uma solução eficaz para esse caso de uso.
