Selected Answer: AE

A. Fairness
Fairness is critical in AI-driven recruitment to ensure AI systems do not perpetuate or amplify biases that could unfairly disadvantage certain groups of candidates. It involves auditing for bias, promoting equitable treatment, and applying fairness metrics to guarantee just decision-making.

E. Transparency
Transparency is essential so that candidates and stakeholders understand how AI systems are making decisions. This includes clear communication about AI involvement in hiring processes and explainability of how decisions are derived, which builds trust and accountability.

The other options—Tolerance, Flexibility, and Open source—are not typically considered core dimensions of responsible AI in recruitment with respect to bias mitigation and equitable practices.

Selected Answer: AE

✅ Fairness
Ensures the model does not discriminate based on gender, race, age, or other protected attributes.

Critical in hiring to provide equitable opportunities to all candidates.

✅ Transparency
Involves understanding how decisions are made by the AI system.

Helps organizations and applicants trust the process and makes it easier to identify and correct issues.
