Selected Answer: D

Amazon Q Business is a fully managed generative AI–powered assistant designed specifically to help employees query internal data, find

information, and gain insights across an organization's documents, databases, and other enterprise systems using natural language. It connects to internal sources and returns accurate, context-aware responses

Selected Answer: D

Amazon Q Business is designed exactly for this:

✔ AI assistant for employees

✔ Connects to internal enterprise data sources

✔ Secure access control and identity integration

✔ Query corporate documents, knowledge bases, wikis

✔ Built-in RAG and retrieval

✔ Zero-setup conversational interface

This is purpose-built for internal AI assistants.
Lex:
Chatbot framework →
It can manage conversation flow, but:
• Cannot connect to internal data by itself
