✔ Amazon SageMaker Ground Truth

Why?
Ground Truth provides human-in-the-loop data labeling, review, and feedback pipelines.
It is used to incorporate human feedback during training or retraining.

✔ Amazon Bedrock Guardrails

Why?
Bedrock Guardrails lets you create safety filters for:
• Harmful inputs
• Harmful outputs
• PII blocking
• Topic restrictions
• Custom rules for responsible AI

This is the AWS service specifically designed for AI safety controls.

✔ Amazon SageMaker Clarify

Why?
Clarify is used to detect:
• Bias in training data
• Bias in model predictions
• Feature importance (explainability)

It is the AWS tool designed for bias detection.
