EXAM AWS CERTIFIED AI PRACTITIONER AIF-C01 TOPIC 1 QUESTION 280 DI...

Exam question from Amazon's AWS Certified AI Practitioner AIF-C01

Question #: 280

Topic #: 1

[All AWS Certified AI Practitioner AIF-C01 Questions]

HOTSPOT

-

A company wants to improve multiple ML models.

Select the correct technique from the following list of use cases. Each technique should be selected one time or not at all.

Enhancing the capabilities of a large language model (LLM) by using external sources

Select...
- Few-shot learning
- Fine-tuning
- Retrieval Augmented Generation (RAG)
- Zero-shot learning

Querying a model to generalize and make predictions on unseen tasks

Select...
- Few-shot learning
- Fine-tuning
- Retrieval Augmented Generation (RAG)
- Zero-shot learning

Querying a model with a limited amount of data for new tasks

Select...
- Few-shot learning
- Fine-tuning
- Retrieval Augmented Generation (RAG)
- Zero-shot learning

✅ 1. Enhancing the capabilities of an LLM by using external sources

✔ Retrieval Augmented Generation (RAG)

Why?
RAG enhances an LLM without retraining by pulling in external knowledge (documents, databases, vector stores).
It is the only option that explicitly adds external sources.

———

✅ 2. Querying a model to generalize and make predictions on unseen tasks

✔ Zero-shot learning

Why?
Zero-shot means the model can handle tasks it was never trained on, using generalization.
This matches “unseen tasks.”

———

✅ 3. Querying a model with a limited amount of data for new tasks

✔ Few-shot learning

Why?
Few-shot uses a small number of examples within the prompt to teach the model a new task.
