EXAM AWS CERTIFIED DEVELOPER - ASSOCIATE DVA-C02 TOPIC 1 QUESTIO...

Exam question from Amazon's AWS Certified Developer - Associate DVA-C02
Question #: 322
Topic #: 1
[All AWS Certified Developer - Associate DVA-C02 Questions]

A developer is creating a simple proof-of-concept demo by using AWS CloudFormation and AWS Lambda functions. The demo will use a CloudFormation template to deploy an existing Lambda function. The Lambda function uses deployment packages and dependencies stored in Amazon S3. The developer defined an AWS::Lambda::Function resource in a CloudFormation template. The developer needs to add the S3 bucket to the CloudFormation template.

What should the developer do to meet these requirements with the LEAST development effort?

A. Add the function code in the CloudFormation template inline as the code property.

B. Add the function code in the CloudFormation template as the ZipFile property.

C. Find the S3 key for the Lambda function. Add the S3 key as the ZipFile property in the CloudFormation template.

D. Add the relevant key and bucket to the S3Bucket and S3Key properties in the CloudFormation template.
