EXAM AWS CERTIFIED DEVELOPER - ASSOCIATE DVA-C02 TOPIC 1 QUESTIO...

Exam question from Amazon's AWS Certified Developer - Associate DVA-C02
Question #: 432
Topic #: 1
[All AWS Certified Developer - Associate DVA-C02 Questions]

A company processes incoming documents from an Amazon S3 bucket. Users upload documents to an S3 bucket using a web user interface. Upon receiving files in S3, an AWS Lambda function is invoked to process the files, but the Lambda function times out intermittently.

If the Lambda function is configured with the default settings, what will happen to the S3 event when there is a timeout exception?

A. Notification of a failed S3 event is sent as an email through Amazon SNS.

B. The S3 event is sent to the default Dead Letter Queue.

C. The S3 event is processed until it is successful.

D. The S3 event is discarded after the event is retried twice.

D
This means that Lambda will make two additional attempts to process the event (a total of three attempts). If the function still fails after the retries, and if no Dead Letter Queue (DLQ) or on-failure destination is configured, the event is discarded.
