EXAM AWS CERTIFIED AI PRACTITIONER AIF-C01 TOPIC 1 QUESTION 61 DIS...

Exam question from Amazon's AWS Certified AI Practitioner AIF-C01
Question #: 61
Topic #: 1
[All AWS Certified AI Practitioner AIF-C01 Questions]

An AI practitioner is using an Amazon Bedrock base model to summarize session chats from the customer service department. The AI practitioner wants to store invocation logs to monitor model input and output data.
Which strategy should the AI practitioner use?

A. Configure AWS CloudTrail as the logs destination for the model.

B. Enable invocation logging in Amazon Bedrock.

C. Configure AWS Audit Manager as the logs destination for the model.

D. Configure model invocation logging in Amazon EventBridge.

Selected Answer: B

B. Enable invocation logging in Amazon Bedrock: Amazon Bedrock provides a built-in option to enable invocation logging. This feature allows you to capture and store detailed logs for model invocations, including input and output data, which helps you monitor and analyze the performance and behavior of the model.

Selected Answer: B

B: Enable invocation logging in Amazon Bedrock.

Explanation:
Amazon Bedrock provides the ability to log model invocations, including input and output data, for monitoring and troubleshooting purposes. By enabling invocation logging in Amazon Bedrock, the AI practitioner can store logs securely and use them to analyze model behavior and performance.
