EXAM AWS CERTIFIED AI PRACTITIONER AIF-C01 TOPIC 1 QUESTION 130 DI...

Exam question from Amazon's AWS Certified AI Practitioner AIF-C01

Question #: 130

Topic #: 1

[All AWS Certified AI Practitioner AIF-C01 Questions]

An AI practitioner is developing a prompt for an Amazon Titan model. The model is hosted on Amazon Bedrock. The AI practitioner is using the model to solve numerical reasoning challenges. The AI practitioner adds the following phrase to the end of the prompt: “Ask the model to show its work by explaining its reasoning step by step.”

Which prompt engineering technique is the AI practitioner using?

A. Chain-of-thought prompting

B. Prompt injection

C. Few-shot prompting

D. Prompt templating

Selected Answer: A

This technique encourages the model to reason through a problem step by step, which is exactly what the AI practitioner is doing by asking the model to "show its work by explaining its reasoning step by step."

Selected Answer: A

CoT prompting involves structuring prompts so that the LLM breaks down complex problems into a series of logical, intermediate steps, similar to how a human would when thinking through a problem.

Selected Answer: A

Chain-of-thought prompting

Chain-of-thought prompting improves the reasoning ability of large language models by prompting them to generate a series of intermediate steps that lead to the final answer of a multi-step problem.
