EXAM AWS CERTIFIED AI PRACTITIONER AIF-C01 TOPIC 1 QUESTION 266 DI...

Exam question from Amazon's AWS Certified AI Practitioner AIF-C01

Question #: 266

Topic #: 1

[All AWS Certified AI Practitioner AIF-C01 Questions]

An online media streaming company wants to give its customers the ability to perform natural language-based image search and filtering. The company needs a vector database that can help with similarity searches and nearest neighbor queries.

Which AWS service meets these requirements?

A. Amazon Comprehend

B. Amazon Personalize

C. Amazon Polly

D. Amazon OpenSearch Service

Selected Answer: D

• A. Amazon Comprehend
→ Natural language processing (entity detection, sentiment, key phrases).
❌ Not a vector database.
• B. Amazon Personalize
→ Builds recommendation systems (like product recommendations).
❌ Not meant for vector similarity queries.
• C. Amazon Polly
→ Text-to-speech service.
❌ Not related.
• D. Amazon OpenSearch Service
→ Search and analytics engine with support for k-NN (k-nearest neighbor) vector search and similarity queries. Can index and query vector embeddings for images and natural language search.
✅ Exactly what's needed

✅ Correct answer: D. Amazon OpenSearch Service
